Re Item V

*Reasoned statement with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement*

There is no disclosure or suggestion in the prior art cited in the international search report of an aqueous slurry comprising a crystalline aluminosilicate and a particulate silica, as of claim 1. In view thereof and well as that a slurry having a structure which is resistant to settling but is readily capable of being discharged from a vessel is obtained, an inventive step is acknowledged. Therefore the requirements of Art. 33(2) and (3) PCT would appear fulfilled. The dependent claims refer to preferred embodiments and therefore also should fulfil the requirements of Art. 33(2) and (3) PCT. For the assessment of the present claims on the question whether they are industrially applicable, no particular reasoning would appear necessary to give. The industrial application would appear to be evident (Art. 33(4) PCT). The attention is however directed to the ranges for n, x and y in claim 1 which will have to be specified.
